YADAVVITTAL

Frontend Developer

8328554111 | vittalyadav8328@gmail.com | github.com/yadavittal | Punjagutta, Hyderabad

SUMMARY

As a results-driven and detail-oriented Frontend Developer with hands-on experience in developing dynamic web applications, I excel in creating responsive and user-friendly interfaces. My expertise in HTML, CSS, JavaScript, and React.js, coupled with a solid understanding of backend technologies, empowers me to contribute effectively to high-quality projects in collaborative environments

TECH SKILLS

Languages: HTML5, CSS3, JavaScript (ES6+), Typescript (Basic), Java (Basic)
Libraries/Frameworks: ReactJS, Next.js (Basics), Node.js, Express.js, MongoDB
Version Control: Git, GitHub
Tools: Visual Studio Code, Postman, Lighthouse
Database: MongoDB, SQL(Basic)
Development Methodology: Agile

EXPERIENCE

Software Engineer Intern

Test Yantra Software Solutions India Pvt Ltd

Bengaluru, India
09/2024 - Present

Software development company specializing in various technologies

- Developed responsive and dynamic UIs using React.js, Hooks, and Tailwind CSS
- Built modular and reusable components with clean, scalable code following React best
- practices.
- Integrated and consumed RESTful APIs built with Node.js and Express.js
- Implemented state management using Redux Toolkit and React's built-in state
- Used React Router for efficient navigation
- Collaborated using Git and GitHub for version control
- Worked on user authentication and authorization flows using JWT.

PROJECT

Patriot Post - Message Wall for Soldiers

Domain: Tribute Platform| Duration: Sept 2024 – Present

Description:

A heartfelt web application that allows users to post and share messages of gratitude and appreciation for Indian soldiers. This platform encourages citizens to express their respect and support through personalized messages, building a digital wall of thanks to honor the bravery and sacrifice of our armed forces. Built a responsive and engaging UI using React.js, Material UI, and Tailwind CSS

Roles & Responsibilities:

- Focused on accessibility and performance to ensure wide public usability
- Collaborated on full-stack integration by connecting frontend with RESTful APIs
- Developed key frontend modules including the letter submission form, tribute wall display, and soldier message dashboard.
